What is neodymium magnet Square magnet?

Size of neodymium magnet Square magnet

We are a manufacturer produce custom magnet, can according the customer request to custom the size&coating&shape. The square magnet is one of the neodymium magnet, If you need the square magnet, we can do for you, just advice our your requirement.

How to express square magnet size?

The square magnet have length/wide/thickness. We usually say square magnet size are length size x wide size x thickness size.

Such as the square magnet 20x10x5mm, this is the length is 20mm, wide is 10mm, thickness is 5mm.

What is size tolerance of square magnet?

The Neodymium magnet square magnet size tolerance is length/wide: ± 0.1 mm , thickness: ± 0.05 , if you have any requirement on the magnet tolerance, you can tell us, we will according your request to do.

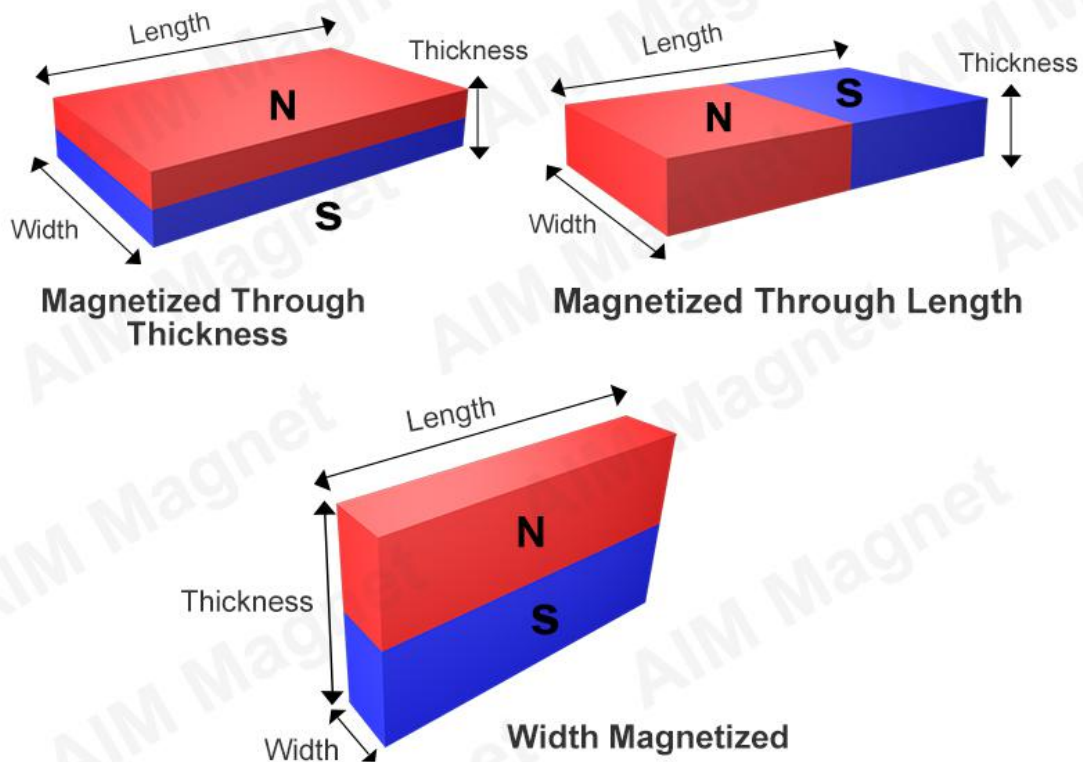

Magnetizing direction of Square magnet

Generally the Neodymium square magnets are length, width or thickness magnetised. such as the size 20*10*5mm.

The length magnetized neodymium rectangle magnet is means the Maximum magnetizing surface(N and S pole) is 20*5mm

The width magnetized neodymium rectangle magnet is means the Maximum magnetizing surface(N and S pole) is 10*5mm

The length magnetized neodymium rectangle magnet is means the Maximum magnetizing surface(N and S pole) is 20*10mm, that is also the normally magnetized directly for rectangle magnet

What is square magnet used for?

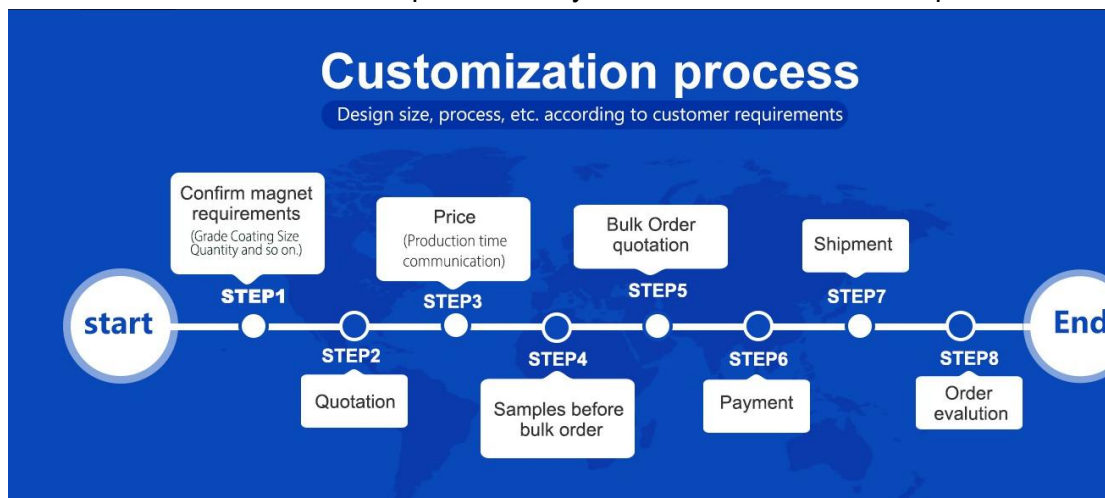

- A. Life consumption: clothing, bag, leather case, cup, glove, jewelry, pillow, fish tank, photo frame, watch;
- B. Electronic product: keyboard, electronic cigarette, display, smart bracelet, computer, mobile phone, sensor, GPS locator, Bluetooth, camera, audio, LED;
- C. Home-based: Lock, table, chair, cupboard, bed, curtain, window, knife, lighting, hook, ceiling;
- D. Mechanical equipment & automation: motor, unmanned aerial vehicles, elevators, security monitoring, dishwashers, magnetic cranes, magnetic filter.

Safety Warning:

1. Make sure keep the magnets are out of reach children and pets, it is not a TOY, and small magnets will pose a choking hazard.
2. Watch your fingers, as they are very strong magnets, which are difficult to pull apart and fly together quickly from far away, so it is very easy to pinch fingers between attracting poles.
3. Keep the magnets far way from medical devices, electronic products, and magnetic media, as our magnets have strong magnetic fields which may affect and/or disrupt the functioning of these medical devices, electronic products, and magnetic media.
4. Magnets are fragile, they can crack, chip, or shatter if allowed to slam against each other. so make sure handle with care, eye protection glasses.

How to order neodymium square magnet?

1. When send inquiry, please advise your details requirements for square magnets.
2. According to customer request, will offer our quotation and production time, if customer have samples, also can send samples for your test firstly, we will offer quotation according to customer's samples.
3. AIM Magnet samples production before bulk order production.
4. Confirm PO/PI and payment
5. Mass production.
6. Shipment
7. Assist customers to follow up the delivery status, after-sales follow-up.

Buyer Guide :

In order to quote you the best price quickly . please provide the following information of neodymium square magnet:

1. neodymium magnet size . grade . coating. ect
2. Order quantity
3. Attached the drawing if customized
4. Any special packing or other requirement
5. The neodymium magnet application(product) and working temperature.
